

SMART Board® MX

Powerful collaboration, simplified.

The delta of value and quality

iQ software offers second to none connectivity, simplicity, and engagement. Free automatic OTA updates, content, and tools reduce support time and help make adoption easy for everyone.

Connectivity forwards and back

Integrations with all the major technology platforms allow for seamless workflows and support. Making accessing everything you need a touch away. Connecting whatever devices, networks, and cloud technology you have.

Optimized for efficiency and ease

Intuitive features help anyone use their displays more easily, more effectively and more often. With true walk up and use design that anyone can master.

Value has never been simpler

Included wall mount, pens, support, warranty, and content means that everything is packaged to increase engagement and reduce stress.

Who is the MX series for?

The SMART Board MX is perfect for anyone looking for leading technology that is simple to connect, deploy, and support at a lower price point than the 6000S. Built-in iQ ensures free over the air updates to keep everything current.
